• Ask the students what they understand from Consignment tracking

Say

• A Consignment is an arrangement in which goods are left in the possession of another party to sell. It may be of any product such as cloths, accessories, books, automotive products, e-commerce products, perishable goods etc.
• A Consignor or Carrier is a person or company that sells or transports goods for any person or company and that is responsible for any possible loss of the goods during transport.
• A Consignee is a person buys goods from a person or a company
• It does not mean that a Consignor sent a shipment will always deliver to the consignee on time, in full quantity as shipped and a guaranteed delivery.
• This means that if a shipment goes missing in a transit you have no idea as to where it is and proof of posting means just that it does not mean guaranteed delivery.
• Many people do not realize this and think that there parcel or a shipment will get to its destination safely and indeed the majority of the time it does, however if your parcel is late arriving at a client, it can then be critical to your business to find out where the parcel actually is.
• Failing to be able to do this could lose you a client very easily, particularly if it never turns up – being able to claim the cost of your parcel back could be inconsequential.
• This is where a consignment tracking executive’s role plays a crucial part.
Unit 1.4 - Roles and Responsibilities of a Consignment Tracking Executive

4. Explain the importance of staying in connection with the driver

Say

- Truck and road freight transportation contributes to more than 70% of the total goods transported domestically across India.

- Some of the key challenges faced by the freight transport industry are shortage of drivers which forces a single driver to drive the vehicle for more than 2000 to 2500 kilometers without any proper rest and focus. Considering the social responsibility and the care take towards the need for rest to the driver, leads to a huge delay in transporting the consignment.

- Environmental issues are also equally considered parameter for the delays in consignments. Natural calamities like flood, cyclones, rainfall, earthquake etc will cause a huge challenge in transporting the goods.

- Traffic congestions are also a major challenge for the freight industry. Considering the growing economy and number of trucks operating in the industry makes traffic congestions in the national highways.

- It is the responsibility of a Consignment tracking executive to gather prior information on any challenges and environmental issues and it is the responsibility of the tracking executive to communicate to the freight transportation company or to the drivers to make aware of the situations in order to tackle them.
Explain

- Some of the challenges that one might face in transporting a consignment
- How to check details and track where the delay is for a consignment

Notes for Facilitation

- You could ask the students to share some of the recent environmental issues like heavy rains in particular region, floods, cyclone which they heard that cause major transportation challenges
- Ask the students to come up with a list of natural climatic disasters in past 2 years that cause transportation disruptions (example: Chennai flood in 2015, Gujarat protest in 2015, Bangalore Cauvery water issue in 2016, Chandigarh-Haryana riot in 2015 etc)

- A vehicle tracking system uses the automatic vehicle location in individual vehicles with software that collects these truck data for a comprehensive picture of vehicle locations. Modern vehicle tracking systems commonly use GPS – Global Positioning System technology for locating the vehicle. Vehicle information can be viewed on electronic maps via the Internet or specialized software.

- The status of the truck movement, parking details can be viewed using the tracking software in the computer system by the consignment tracking executive for information updates

Explain

- Explain the students the importance of fire and safety trainings in a logistics company or a warehouse
- Explain the students what are importance of wearing a hard hat helmets and other require PPE – Personal Protective Equipment while carrying out a warehouse operations
- The importance of the evacuation plan and the necessary procedures to be followed on during emergency time
- The list of points to checked while receiving and accepting a consignment
- The importance of Work instructions given by the organization
**Demonstrate**

- Do’s and Don’t’s in following Work instructions with suitable pictures and tables.

---

**Elaborate**

- Take a walk through in any multi-national shop and observe the actions being taken to serve the customer. Rarely will you see someone with an open work instruction book reading about how his or her particular task is to be completed. The vast majority of shop employees know what it takes to ensure that a high-quality product arrives at the customer’s dock on time. They have been instructed in specific tasks, and they follow those instructions.

- So what is the purpose of documented work instructions? Besides having them available for audit review, why do such documents exist? Work instructions are developed to guide workers in four key quality areas: training, reference, problem solving and continuous improvement.

- Each of these areas can be directly related to the Deming Cycle, a cycle that identifies fundamental quality planning as “Plan-Do-Check-Act.” It is important to establish (plan) the instructions that your people must execute. The references must then be effectively implemented (do) so they are accessible to personnel. Documentation must be verified (check) so the instructions assist your problem-solving methodology. Finally, it is important to use (act) what has been defined in order to continuously improve.
UNIT 2.8 - Escalation Matrix for Reporting

At the end of this unit you will be able to:
1. Get to know about the reporting structure
2. Explain the various channels of communication
3. Realize the escalation matrix in the organization structure

- Explain the students the process reporting to the immediate supervisor or management about the status of the consignment tracking process
- The challenges that an individual working as a consignment tracking executive would come across in tracking operations

Say

- There are several reasons for a consignment to get delayed and some of them are as follows;
  - Reasons for truck/freight delays
  - Shortage in quantity received
  - Transit damage during receiving
  - Product mismatch etc.

Demonstrate

- Ask a student to act as a Consignment tracking executive and another student as a Warehouse supervisor and demonstrate the process of escalating the challenges or problem identified during the tracking operation and how to rectify the problem.
Unit Objectives

At the end of this unit you will be able to:

1. Explain about the infrastructure challenges related to freight movement by Road
2. Brief the regulations behind the movement of hazardous materials
3. Describe the important points to be noted down by a consignor
4. Get clarified on the responsibilities of a transport owner and a driver

Say

- The Central Motor Vehicle rules states the basic safety codes and safety requirements to be followed in transportation of any materials through road transportation
- The professional working as a consignment tracking executive needs to have an in-depth knowledge of the product or commodity that is being transported and should adhere to the laws as dictated by the local and national authorities
- Presently there are 177 interstate check posts and 268 toll barriers on national highways across India.

Explain

- The basic transit rules for transporting goods between various states in India
- The mandatory documents required necessary for an interstate transport
- The necessary check list or steps to be carried out in a check post before passing the goods
Elaborate

- Every goods carriage carrying dangerous or hazardous goods shall display a distinct mark of the class label appropriate to the type of dangerous or hazardous goods. Every package containing dangerous or hazardous goods shall display the distinct class labels appropriate to the type of dangerous or hazardous goods. In the case of packages containing goods which represent more than one hazard, such packages shall display distinct labels to indicate the hazards. Every goods carriage carrying goods of dangerous or hazardous nature shall be fitted with a techograph, an instrument to record the lapse of running time of the motor vehicle; time speed maintained, acceleration and declaration etc., and a spark arrester.

- The goods carriage has a valid registration to carry the hazardous goods, the vehicle is equipped with necessary First-aid, Safety equipment and antidotes as may be necessary. The transporter or owner of the goods carriage has full and adequate information about the dangerous or hazardous goods being transported. The driver of the goods carriage is trained in handling the dangers posed during transport of such goods. Every consignor shall supply to the owner of the goods carriage full and adequate information about the dangerous or hazardous goods, being transported as to enable such owner and its driver.

- It shall be the responsibility of the owner or transporter to ensure the following, The goods carriage has valid registration and permit and is safe for the transportation of the said goods. The Vehicle is equipped with necessary First-Aid, Safety equipment, tool box and antidotes as may be necessary to contain any accident.

- It is the responsibility of the driver to keep all information provided to him in writing i.e., in the form TREM CARD (Transport Emergency Card). This is to be kept in the drivers cabin and is available at all times while hazardous material related to it is being transported.
Unit 2.10 - Detailed Understanding of the Tracking Systems

Unit Objectives

At the end of this unit you will be able to:

1. Detail apprehension about the tracking system
2. Explain the differences between Manual tracking and automated tracking
3. Realize the ease and comfortability in using GPS tracking

Explain

• The importance of tracking a consignment and the types of tracking systems for tracking a consignment
• The advantage and disadvantages of a Manual tracking system
• The advantage and disadvantages of an Automatic tracking system
• The GPS tracking system and its devices in detail
• The necessary system requirements for a GPS tracking system

Lab

• Give practical demonstration to a Manual tracking system – This could be demonstrated with a help of a consignment tracking number ordered through an e-commerce website (say Flipkart, Amazon, Snap deal etc.) and the contact details of the executive who will be delivering the product. You could give the contact to a student and ask them to get the status of the delivery / shipment and record the details updated by the executive.
• Give practical demonstration to the GPS tracking system
• Demonstrate how to track a truck or a fleet using the GPS tracking system and how to observe the details from the system.

Exercise

• Give assignment Ask the students collect various tracking system available with its advantage and disadvantage
Unit 2.11 - Nature of Products Transported

Unit Objectives

At the end of this unit you will be able to:
1. Get clarified about the different types of goods and their classification
2. Recognize the various types of dangerous goods that are transported
3. Explain appropriate handling instructions to the type of the goods.

Say

• The transportation of products through trucks following legal regulation involves a careful study and consideration of many factors like;
  • Perishability: Products which are perishable in nature are distributed by employing a shorter channel of distribution so that goods could be delivered to the consumers without delay. Delay in distribution of these products will deteriorate their quality.
  • Size and weight of product: Bulky and heavy products like coal and food grains etc. are directly distributed to the users involve heavy transportation costs. In order to minimize these costs a short and direct distribution channel is suitable.
  • Standardization: Products of standard size and quality usually take longer time by adopting longer channel of distribution. For example, machine tools and automobile products which are of standard size reach the consumer through the wholesalers and retailers. Un-standardized articles take lesser time and pass through shorter channels of distribution.
  • Technical Nature of Products: Industrial products which are highly technical in nature are usually distributed directly to the industrial users and take lesser time and adopt shorter channel of distribution. In this case after sales service and technical advice is provided by the manufacturer to the consumers. On the other hand, consumer products of technical nature are usually sold through wholesalers and retailers. In this manner longer channel of distribution is employed for their sales. After sales services are provided by the wholesalers and retailers. Examples of such products are televisions, scooters, refrigerators, etc.
Explain

- Dangerous or Hazardous Goods shipping is a very complex process and it should always be handled by a professional that has a high level of expertise in the transportation of hazardous goods.
- Dangerous goods include any hazardous chemicals, articles and substances capable of posing a significant risk to health, safety, property or the environment.

- What is the truck route plan
- How to identify the optimum truck route for a destination
Elaborate

- The route tracker in the system tracks the route and share it in real-time data with the systems which can be taken by the consignment tracking executive for getting the status of the consignment.

- GPS is a satellite based technology which uses a Global Navigation Satellite System (GNSS) network. It uses a microwave signal which is sent to the GPS device. It gives provision for both real-time and historical data recording. The device carrying a GPS system comprises of a GPS module which receives the signals and is also responsible for calculating the co-ordinates. It can also transmit location and telemetry input data or when an event takes place like a door open/close, whenever vehicle stops and starts the travel etc.

- Trucks follow pre-defined optimized routes set by organization, which reduces fuel consumption and also travel time.

- It has helped to reduce pollution since the trucks take the shortest routes possible and are well maintained.

- Helps to monitor the truck driver’s driving pattern which help the consignment tracking executive to get the status of each consignment in one system.
UNIT 3.2 - Tracking and Tracing of Consignments and Vehicles

Say

• There are many challenges faced by transporting the consignment across the country. Some of the common challenges faced by the truck driver are given below;
  • Truck driver’s safety and comfort
  • Crucial issue regarding highway robberies of materials transported
  • Natural disasters and calamites challenges
  • Sudden transporters organisation strikes etc.

• It is the responsibilities of the consignment tracking executive to identify the challenges from the truck operators or drivers in covering the destination and take quick decision to update the management about the status of the consignment, educate and provide solutions to the truck driver to evade the challenges

• For instance 2016 agitation in Haryana has affected the production and distribution of many auto companies in the region

**Say**

- To be more productive, it is essential to plan and manage time
- Planning and organization make efficient use of your time at the office by keeping you focused from beginning to completion of a project.
- An organizational plan also facilitates collaboration and information sharing with other team members who play a role in the completion of the activities.
- What is planning? Action planning is a process which helps you to focus your ideas and decide on the steps you need to take in order to achieve a particular goal. Planning is vital at all levels in the workplace. You need to plan your own tasks and time.

**Notes for Facilitation**

- How to maintain and erase confidential data used during tracking a consignment
- How to save all data, safely log off and switch off the computer.
- How to dispose any unnecessary documents or papers.
- How to clean up the work area for shift handover
Say

- In consignment tracking setting a schedule for clearing out old files can help get rid of outdated or unnecessary documents and clear up space for future use. However, this practice can also help any business, large or small, reduce their risk of exposing confidential data.

- A consignment tracking executive might make use of many confidential data related to a consignment like:
  - Personal phone numbers
  - Communication address
  - Bank account details
  - Important SWIFT codes
  - Commercial documents etc.

- As a responsible individual working as a consignment tracking needs adhere to organizations procedure to avoid exposing confidential information that can increase the risk of fraud, data breaches or identity theft that could result for their company, their customers or even their own employees.

Tips

- Here are some tips to learn when and how to dispose of sensitive documents;

1. Know when to hold and when to throw

2. Create a retention policy - Determine which documents need to be kept and for how long. Limit the number of personnel who have access to files and storage closets and practice a company-wide commitment to this practice.

3. Clearly mark a destruction date - The destruction date should be clearly marked on all records that are in storage. All file boxes should contain complete lists of their contents in a visible spot on the outside of the box so it is easily identifiable.

4. Hire a reliable third-party vendor for your document destruction needs that will provide you with a certificate of destruction upon completion and also provide an opportunity for this material to be recycled once destroyed

5. Out with the old, in with the new. Implement document destruction processes on a regular basis. Overhauling your current disposal process with a commitment to continuously destroying confidential data in a secure manner is one of the ways to mitigate the risks associated with data breaches.

6. Shred-all - Implementing a “shred-all” policy for the disposal process when all unneeded documents are fully destroyed on a regular basis. This dramatically minimizes any potential risk or exposure.

Unit Objectives

At the end of this unit you will be able to:
1. Explain the reporting structure in breach of protocols
2. Get knowledge on data breach and ways of overcoming it
3. Recognize the security measures to overcome data breach

Explain

- What is mean by the term ‘Data breach’
- Explain how to overcome data breaches
- Explain the escalation procedures in case of any data breaches.

Elaborate

- A data breach is a security incident in which sensitive, protected or confidential data is copied, transmitted, viewed, stolen or used by an individual unauthorized to do so. This may include incidents such as theft or loss of digital media such as computer tapes, hard drives, or laptop computers containing such media upon which such information is stored unencrypted, posting such information on the world wide web or on a computer otherwise accessible from the internet without proper information security precautions.
- Transfer of such information to a system which is not completely open but is not appropriately or formally accredited for security at the approved level, such as unencrypted e-mail, or transfer of such information to the information systems of a possibly hostile agency, such as a competing corporation or a foreign nation, where it may be exposed to more intensive decryption techniques.
- The most common concept of a data breach is an attacker hacking into a corporate network to steal sensitive data.
Steps

- Steps to be followed or the escalation procedure to be considered in case of any security breach or violation in information security systems;

1. What constitutes a “breach?”
2. Whom should I contact in the event that printed information is involved in a breach of security?
3. Whom should I contact in the event that electronic information is involved in a breach or an electronic device is lost/stolen?
4. Whom should I contact in the event of a physical theft?
5. What happens after I initially report a breach?

6. Employability & Entrepreneurship Skills
Introduction: Employability and Entrepreneurship Skills

This Facilitator’s guide includes various activities which will help you as a facilitator to make the sessions participative and interactive.

**Ice breaker**

- You can begin the module with the following ice breaker:

**Five of Anything Ice Breaker Steps:**

1. Divide the participants into groups of four or five by having them number off. (You do this because people generally begin a meeting by sitting with the people they already know best.)
2. Tell the newly formed groups that their assignment is to share their five favourite movies of all time, their five favourite novels or their five least liked films. The topic can be five of anything - most liked or disliked.
3. This ice breaker helps the group explore shared interests more broadly and sparks lots of discussion about why each person likes or dislikes their selected five.
4. Tell the groups that one person must take notes and be ready to share the highlights of their group discussion with the class upon completion of the assignment.

**Expectation Mapping**

1. During the first session and after ice breaker session, ask the participants to answer the following question: “What do I expect to learn from this training?”
2. Have one of the participants write their contributions on a flip chart sheet.
3. Write down your own list of covered material in the training on another flip chart sheet.
4. Compare the two sheets, commenting on what will and what will not be covered during the training.
5. Set some ground rules for the training sessions. Ask the participants to put these rules on a flipchart and display it in the class.
6. You may get back to those sheets once again at the end of the last session of the training.
7. Benefits of doing this activity:
   - Participants feel better as their opinions are heard.
   - Participants get to know what they should expect from the training.
   - The facilitator gets to know which points to emphasize, which to leave out, and which to add during the training.
8. Expectations from the participants:
   - Must sign the attendance sheet when they arrive for class.
   - Conduct themselves in a positive manner
   - Be punctual, attentive, and participative
9. Explain the contents that are going to get covered one by one and connect it with the expectation mapping done earlier.
10. By the end of this exercise, the participants should have a clear understanding of what to expect from the session and what are the areas that will not get covered.

**Defining Objectives**

1. Defining the objectives in the beginning of the units sets the mood for the unit.
2. To begin with the end in mind sets the expectations of the participants as what could be the important takeaways from the session.
3. It is also a way of making participants take responsibility of their own learning process.
4. For the facilitator, the objectives decide a designed path to progress on so that the learning stays aligned and on track.
In order to effectively facilitate this workshop:

1. You must have thorough knowledge of the material in the Participant Handbook, and be prepared to answer questions about it.
2. You may also wish to read other material to enhance your knowledge of the subject.
3. There may be issues raised with which you are not able to deal, either because of lack of time or knowledge. You can either state that you will obtain answers and get back to the participants with the information. In case the query can be turned to an assignment to the class, do so. You can work with the the participants on the assignment.
4. You must have a very clear understanding of what the participants want to accomplish by the end of the workshop and the means to guide the participants.
5. As the facilitator, it is your responsibility to make sure that all logistical arrangements are made for the workshop. This may involve doing it yourself or confirming that someone else has made all necessary arrangements associated with the workshop. Assume nothing and check everything before the workshop begins.
6. To break the monotony and boredom during sessions, introduce mini breaks in the form of stretching exercises, jokes, some group songs or games.
7. Invite discussion from the participants.
8. Probe the participants further and lead them to come to affirmative conclusions.
9. Let the participants answer. No answer is incorrect.
10. Ask one participant to write all the points on the whiteboard.
11. Build the sessions from the answers provided by the class.
12. Prepare for the sessions in advance so that the resources like flipcharts, handouts, blank sheets of paper, marker pens, etc. can be kept ready.
13. Ensure that resources like board, markers, duster etc. is available before your session starts.

General instructions for role playing:

1. You are not being asked to be an actor or to entertain. The purpose of the role play is to provide a situation in which you can practice certain skills.
2. When you read the brief, try to imagine yourself in the situation described and behave in a way you feel to be natural – but be conscious of the fact that your role may require a different approach from that which you might normally use.
3. You (and others) may benefit from the change in approach and behaviour. Therefore, try to use the approach you feel to be most appropriate for the circumstances described in your brief.
4. The brief is just the starting point. It simply sets the scene and the tone of session or activity. Try not to keep referring to the brief as this will affect the spontaneity of the meeting. Allow the role play to develop as you think it might in real life and change your reactions in line with the behaviour and responses of others involved.
5. If you find that you have too little information to answer questions or to describe what has happened in the situation, do feel free to add your own thoughts and ideas. Try to keep these within the framework of the role you are taking and try to make your improvisations as realistic as possible.

The tide was fresh and the starfish were alive. The man took a few steps, picked one and threw it into the water. He did that repeatedly. Right behind him there was another person who couldn't understand what this man was doing. He caught up with him and asked, "What are you doing? There are hundreds of starfish. How many can you help? What difference does it make?" This man did not reply, took two more steps, picked up another one, threw it into the water, and said, "It makes a difference to this one." What difference are we making? Big or small, it does not matter. If everyone made a small difference, we'd end up with a big difference, wouldn't we?

Soring’s idea is to have a centralised purification system at the point of distribution like water tank while Subash’s idea is to have such purifiers attached to public taps.

This is a story of a innovative solar seeder and developed by Subash Chandra Bose, a class 8, student from St Sebasthiyar Matriculation School, Pudukkottai, Tamil Nadu. Subash has developed a solar powered seed drill, which can undertake plantation for different size of seeds at variable depth and space between two seeds.
**Ask**
- If they can, why can't you?
- Discuss concepts related to 'Creativity and Innovation' with the participants as given in the Participant Handbook.

**Say**
- Recall the stories on motivation.
- What is the inner drive that motivates people to succeed?
- Let’s learn more about such creative and innovative entrepreneurs with the help of an activity.

**Team Activity**
- This is a group activity.
- Think of any one famous entrepreneur and write a few lines about him or her.

**Activity De-brief**
- Why did you choose this particular entrepreneur?
- What is his/her brand name?
- What creativity does he/she possess?
- What was innovative about their ideas?

**Do**
- Instruct the participants that this is group work.

UNIT 6.1.6: Time Management

Unit Objectives

At the end of this unit, participants will be able to:

- Discuss the benefits of time management
- List the traits of effective time managers
- Describe effective time management techniques

Resources to be Used

- Participant Handbook

Ask

Does this sound like you?

- I can never get enough time to finish what I am doing in a day.
- I have so many things to do that I get confused.
- I want to go for a walk and exercise, but I just do not have the time.
- I had so much to do, so I could not deliver that order on time.
- I would love to start my dream business; but, I just do not have the time.

Example

- Let’s look at these two examples:

Example 1:
Ankita works from home as a freelance writer. She says she can easily put in 8 hours of dedicated work in a day. Because she works from home, she saves money on travel and has a comfortable work routine. But there is a challenge and it is distraction. As she works from home, she can easily just get up and sit down on the sofa to watch TV, wasting valuable time. She may have chores to do, errands to run and bills to pay. She ends up working only two to three hours a day and the result is, her work gets piled up. She is unable to take on more work due to this. Even though her quality of work is appreciated her clients are not very happy about the delay in submission.

Example 2:
Javed has started a successful online selling company from home and makes a good living from his sales. He has set up a small office space in his living room. As both his parents are working full-time, he also has the role of taking care of his two younger siblings. He almost spends half of his day with the younger kids. He does not mind it but it means taking time away from the work. He is still able to manage his online business with these commitments. He wants to spend some more dedicated hours so as to increase his profits. He also wants to look into new business avenues. What should he be doing.

Ask

- Does this happen with you too?
- Do you find it difficult to prioritize your work?
- Are you able to manage your time effectively?
Activity

- Conduct a group discussion based on the above examples.
- Direct the discussion on how to prioritize work and manage time effectively.

Say

- Time management is not only about how hard you work but also about how smart you work.
- Discuss “What is Time Management” with the participants as given in the Participant Handbook.

Ask

- Why is it important to manage time? How does it help?
- What happens when you don’t manage your time effectively?
- Do you find it difficult to prioritize your work?

Say

- Discuss the benefits of time management given in the Participant Handbook.
- Let’s learn effective time management with the help of an activity.

Activity

Effective Time Management
- This activity has two parts:

PART 1
TO-DO LIST

- You have to make a to-do list.
- List all of the activities/ tasks that you have to do.
- Try to include everything that takes up your time, however unimportant it may be.
- If they are large tasks, break them into action steps, and write this down with the larger task.
- You can make one list for all your tasks or have separate to-do lists for personal and professional tasks.

PART 2
URGENT-IMPORTANT GRID

- You have to make a grid as shown on the board here.
- This grid has four boxes. As you can see, each box has a different heading.
- At the heart of the urgent-important grid, are these two questions:
  - Is this task important?
  - Is this task urgent?
- Now, you have to think about each activity that you have written in your to-do list and put it into one of the four categories.
- What do these categories depict?
- Category 1: Urgent/Important
  - This category is for the highest priority tasks. They need to get done now.
Conduct a group discussion based on the above examples. Direct the discussion on how to prioritize work and manage time effectively.

Say

**TO-DO LIST**

You have to make a to-do list.

List all of the activities/tasks that you have to do.

You have to make a grid as shown on the board here.

This grid has four boxes. As you can see, each box has a different heading.

At the heart of the urgent-important grid, are these two questions:

- Is this task important?
- Is this task urgent?

Now, you have to think about each activity that you have written in your to-do list and put it into one of the four categories.

**Category 1: Urgent/Important**

- This is where you want to spend most of your time.
- This category allows you to work on something important and have the time to do it properly.
- This will help you produce high quality work in an efficient manner.
- The tasks in this category are probably the most neglected ones, but also the most crucial ones for success.
- The tasks in this category can include strategic thinking, deciding on goals or general direction and planning – all vital parts of running a successful business.

**Category 2: Not Urgent/Important**

- This is where you want to spend most of your time.
- This category allows you to work on something important and have the time to do it properly.
- This will help you produce high quality work in an efficient manner.
- The tasks in this category are probably the most neglected ones, but also the most crucial ones for success.
- The tasks in this category can include strategic thinking, deciding on goals or general direction and planning – all vital parts of running a successful business.

**Category 3: Urgent/Not Important**

- This is where you are busy but not productive. These tasks are often mistaken to be important, when they’re most often busywork.
- Urgent but not important tasks are things that prevent you from achieving your goals.
- However, some may be activities that other people want you to do.

**Category 4: Not Important and Not Urgent**

- This category doesn’t really include tasks, but rather habits that provide comfort, and a refuge from being disciplined and rigorous with your time management.
- Some may be activities that other people want you to do.
- These might include unplanned leisure activities as well.

Do
Put down the formats for the to‐do list and the urgent/important grid on the board.

Instruct the participants to prepare their to‐do list first.

Give the participants 10 minutes to prepare the list.

Once done, instruct them to divide the tasks in to‐do list into the four categories.

Explain the four categories to the participants giving examples specific to their context.

As you explain the categories fill the grid with the type of tasks.

Give the participants 40 minutes to fill the grid.

Then explain how to balance the tasks between the four categories.

Keep a check on time. Tell the group to wind up quickly if they go beyond the given time limit.

Activity De‐brief:
How can we balance tasks between the four categories?
How to manage time through this grid?

Category 1: Urgent/Important
Try to keep as few tasks as possible here, with the aim to eliminate.
If you spend too much of your time in this category, you are working solely as a trouble shooter, and never finding time to work on longer‐term plans.

Category 2: Not Urgent/Important
Plan these tasks carefully and efficiently as they are most crucial ones for success.
If necessary, also plan where you will do these tasks, so that you're free from interruptions.
Include strategic thinking, deciding on goals or general direction and planning in your planning process.

Category 3: Urgent/Not Important
Ask yourself whether you can reschedule or delegate them.
A common source of such activities is other people. Sometimes it's appropriate to say “no” to people politely, or to encourage them to solve the problem themselves.

Category 4: Not Important and Not Urgent
You also want to minimize the tasks that you have in this category.
These activities are just a distraction – avoid them if possible.
You can simply ignore or cancel many of them.
Politely say “no” to work assigned by others, if you can, and explain why you cannot do it.
Schedule your leisure activities carefully so that they don’t have an impact on other important tasks.

Discuss the traits of effective time managers and effective time management techniques as given in the Participant Handbook.

Notes for Facilitation

- Here is a short story. You can conclude the session narrating the story. To make it more interesting you can perform the demonstration described and discuss the short story.
  - One day an expert in time management was speaking to a group of students. As he stood in front of the group, he pulled out a large wide-mouthed glass jar and set it on the table in front of him. Then he took out a bag of about a dozen rocks and placed them, one at a time, into the jar. When the jar was filled to the top and no more rocks would fit inside, he asked, "Is this jar full?" Everyone in the class said, "Yes." Then he said, "Really?"
  - He reached under the table and pulled out a bucket of gravel (small stones). He dumped some gravel in and shook the jar causing pieces of gravel to work themselves down into the space between the rocks. Then he asked the group once more, "Is the jar full?" By this time, the class began to understand. "Probably not," one of them answered. "Good!" he replied.
  - He reached under the table and brought out a bucket of sand. He started dumping the sand in the jar and it went into all of the spaces left between the rocks and the gravel. Once more he asked the question, "Is this jar full?" No!" the class shouted. Once again he said, "Good." Then he grabbed a jug of water and began to pour it in until the jar was filled to the brim. Then he looked at the class and asked, "What is the point of this illustration? "One student raised his hand and said, "No matter how full your schedule is, if you try really hard you can always fit some more things in it!" "No," the speaker replied, "that's not the point. The truth this illustration teaches us is: If you don't put the big rocks in first, you'll never get them in at all." What are the 'big rocks' in your life? Your children; your loved ones; your education; your dreams; a worthy cause; teaching or mentoring others; doing things that you love; time for yourself; your health; your mate (or significant other). Remember to put these BIG ROCKS in first or you'll never get them in at all. If you sweat about the little stuff (the gravel, sand, and water) then you'll fill your life with little things you worry about that don't really matter, and you'll never have the time you need to spend on the big, important stuff (the big rocks).

- End the story with these lines...
  So, tonight, or in the morning tomorrow, when you are reflecting on this short story, ask yourself this question: What are the 'big rocks' in my life? Then, put those in your jar first.

Post presentation, the other groups may ask questions to the group that has presented.

If yes, how do you think that the stress could be avoided (managed)?

Then discuss the issue identified and the proposed solution.

The group will first briefly describe the case to the class.

What was/ were the cause(s) of stress?

Was the stress avoidable or manageable under the given circumstances?

If yes, how do you think that the stress could be avoided (managed)?

If no, then why not?

Now, let’s discuss the problem and solution with the larger group.

The group will first briefly describe the case to the class.

Then discuss the issue identified and the proposed solution.

Post presentation, the other groups may ask questions to the group that has presented.

Congratulations for sharing your points.

Keep a check on time. Tell participants to wind up the discussion quickly if they go beyond the given time limit.

While it is common and normal to feel some tension. This feeling nervous and tensed can interfere with your thinking process and can have a negative impact on your performance.

Stress can deplete the most vibrant of souls. It can have a negative effect on every aspect of a person’s life including their health, emotional well-being, relationships, and career. However, one needs to understand the causes and types of stress before looking for ways to manage it.

De-brief:

Scenario 1
The cause of stress was lack of time management and the habit of procrastinating. If Akash would have managed his time well, planned alternate ways to get up on time, finished prior tasks on time and planned for client meetings in advance then he wouldn’t have faced stress.
Stress can deplete the most vibrant of souls. It can have a negative effect on every aspect of a person's life.

Post presentation, the other groups may ask questions to the group that has presented. If yes, how do you think that the stress could be avoided (managed)?

Then discuss the issue identified and the proposed solution.

Was the stress avoidable or manageable under the given circumstances?

Now let us see this scenario, can I have a volunteer to read out this case to the class.

Do

- Ask one of the participant who can volunteer and read out this scenario to the class.

Scenario 5

Rakesh lives in Kathmandu with his wife and two beautiful daughters Sarah and Sanya. Nepal was hit by a massive earthquake and Rakesh’s building collapsed during the earthquake. During evacuation, Rakesh realised that though his wife and Sarah were fine and suffered only minor bruises, Sanya was nowhere in the scene. Panic stricken, he started calling her name and searching her frantically. A little later, he heard a meek voice from beneath the debris. He quickly removed the rubble to find a huge bed. Rakesh was pretty sure that Sanya was trapped underneath. Though he was badly bruised, he gathered all his courage and with all his might, he lifted the several-ton bed to save Sanya’s life. Everyone was relieved to see Sanya alive and also extremely surprised to see this father’s ability to access superhuman strength.

- Ask the audience to applaud for the participant after the scenario is read completely.
- Discuss the scenario, ask de-brief questions:
  - What kind of stress was Rakesh undergoing in this case?
  - Was the stress avoidable or manageable under the given circumstances?
  - What was the result of the stress?

Say

De-brief:

- Not all stress is harmful; good stress is actually energizing. This was a case of lifesaving stress, or hero stress, which is an important example of good stress. You may have heard stories in which a person performs an impossible feat of physical strength in order to save their life or the life of someone they love. This type of stress causing a surge of adrenaline is good for us.
Notes for Facilitation

- Keep printed copies of the activities/scenarios ready for the session.
- Put down the de-brief questions on a flip chart so that it can be displayed in the class during the activity.
- Encourage participation and make the discussions interactive.

Summarize

- Close the discussion by summarizing the tips to manage stress as given in the Participant Handbook.
- Ask the participants what they have learnt from this exercise/activity.
- Ask if they have any questions related to what they have talked about so far.

This connectivity will in turn enhance e-commerce activities also. Furthermore, the Indian Government is also modernizing India Post and aims to develop it as a distribution channel for e-commerce related services.

**Say**

- Now let us discuss how to sell a product using E-commerce.
- Every product has to be sold on a platform on the internet. Think of it as a shop that you have to sell your product. Now this shop can be your own or shared or rented. If the shop is your own or rented there will be only your products in that shop. If the shop is shared, there will be products of multiple sellers in that shop. A common example is a departmental store which has products from multiple brands in the shop.
- Similarly, in E-commerce the shop is the website where your products are displayed. If it is your own website it will exclusively showcase your products. In this case the cost that you will incur will be:
  - Developing the website
  - Hosting the website
  - Maintenance of the website
- If you rent a website it will also showcase your own products but the development, hosting and maintenance parts goes to the owner. This saves time and the cost to manage these activities.
- Smaller companies usually go for renting a website and the bigger ones develop their own website.
- The concept of shared platforms has become very popular in recent times. In this platform the sellers have to register and then they can sell their goods on a common platform. Among the most popular of these are Amazon, Myntra, Flipkart, etc.

**Role Play**

- Tell the participants to choose a product or service that they want to sell online.
- Tell them to write a brief note explaining how they will use existing e-commerce platforms, or create a new e-commerce platform to sell their product or service.
Demonetization has made carrying cash in the wallet very difficult. People either shop through cards or some other form of digital money.

So what do you think is digital money?

In this form the money is both paid and received digitally. There is no hard cash involved. It is an instant and convenient way to make payments.

There are various types of digital payments. Let us discuss some of them in brief here.

The first one is the most commonly used system i.e. the cards. Debit card, credit card, prepaid card, all fall under this category.

Then is the e-wallet or the mobile wallet. This has become the most used form of digital money after demonetization. Examples are Paytm, state bank buddy, Freecharge, etc.

Many other forms of digital money are also coming up in market like mobile apps, Aadhar card based payment, etc.

Digital money gives a lot of advantages over the conventional hard cash. Some of them are:

- Digital payments are easy and convenient. You do not need to take loads of cash with you, a mobile phone or a card will suffice.
- With digital payment modes, you can pay from anywhere anytime.
- Digital payments have less risk.

**De‐brief:**
- Keep this in mind: Do not criticize anyone during an interview.
- You are free to express your opinion, however, your language, answers, body language, and the tone of your voice should remain constructive and neutral.
- Since criticism will show you in negative light, you should keep your answers honest yet diplomatic.
- You can tackle such questions by saying, “I got along well with most of my faculty and peers.”
Conduct a role play for the situation given.

Role Play – Situation 4

- The interviewer will start by asking the interviewee a few generic questions such as:
  - What is your name?
  - Tell me something about yourself?
  - Can you tell me something about your family?
- Then very bluntly ask the interviewee:
  - How long do you plan to stay with this company if you are selected?
- After the candidate responds, ask sarcastically:
  - Do you seriously mean that?

Say

De-brief:

- Don’t provide unreal and idealistic answers.
- Your answers should be honest yet diplomatic. In a situation like this, the interviewer does not expect you to provide a specific timeline.
- You can say something like, “I would like to stay with the company as long as I can contribute constructively and develop as an employee, within the organization, professionally and financially.”

Role Play

Conduct a role play for the situation given.

Role Play – Situation 5

- The interviewer will start by asking the interviewee a few generic questions such as:
  - What is your name?
  - Tell me something about yourself?
  - Can you tell me something about your family?
- Ask him/her how important he/she thinks it is to be punctual in the corporate world.
- After he/she answers, look up sternly at the interviewee and in a crisp voice, say:
  - You were late for this interview by 10 minutes. That surely does not seem to be in line with what you just said?

Say

De-brief:

- Politely apologize for being late.
- You can add something such as, “I assure you this is not a habit”. All your future actions should be in line with this statement.
- Avoid giving any excuses.
- You might feel obligated to provide a justification for your tardiness, but the interviewer is not interested in that.
- Do not over apologize. Once this response is out of the way, turn your focus back to the interview.
Conduct a role play for the situation given.

**Role Play – Situation 4**

- After asking a few academic or job-related questions, ask the interviewee:
  - If you get this job, what salary package do you expect us to give you?

**Say**

**De-brief:**
- If there is no way for you to avoid this question, respond to the interviewer by providing a reasonable and well-thought out salary range.

  - What is your name?
  - Tell me something about yourself?
  - Can you tell me something about your family?
- After asking a few academic or job-related questions, ask the interviewee:
  - Do you have any questions for me?

**Say**

**De-brief:**
- Ask relevant questions.
- Don’t bombard the interviewer with questions.
- If you have questions about the result of the interview, you can limit your questions to 1 or 2. Keep them short and relevant like:
  - When will I be informed about the results of the interview?
  - What are the working hours?
  - Will the job require me to travel?

**Explain**

- Tell the participants to be prepared for answering different types of questions in an interview.
- Stay calm and focused, and take a moment to think about how you should respond. Always maintain a confident tone.

<tr>

</tr>
</tbody>
</table>
Answers:
There's no law against a man marrying his widow's sister, but it would be the neatest trick in the book since to have a widow, the man would have to be dead.

You'd get one hour's sleep since alarm clocks do not know the difference between morning and night.

Oh, yes. They have a 26th of January in England. They also have a 27th, a 28th, and so on.

First of all, you would light the match.

Who said the Delhi Daredevils and the Chennai Super Kings were playing against each other in those games?

Every SINGLE person died, but those two were married.

You can't bury survivors under any law especially if they still have enough strength to object.

The bear that rang the doorbell would have to be a white bear. The only place you could build a house with four southern exposures is at the North Pole where every direction is in South.

Ask
De-brief question:
- What were the barriers that came into your way of listening?
- How can you overcome barriers to listening?

Say
- There is a difference between hearing and listening.
- If you don't listen properly, the message may be misunderstood.
- Be open-minded while listening to someone.
- It is important to listen effectively and carefully without making assumptions.

Activity 3
Elevator Pitch:
You are in the lift of a hotel and you bumped into your former client who is a famous businessman. He has financed a lot of small business ventures and can finance your new start-up too. After exchanging pleasantries, he asks you what your organization does. You open your mouth, and then pause. Where do you even begin?
Then, as you try to organize your thoughts, his meeting is called, and he is on his way. If you would been better prepared, you're sure that he would have stayed long enough to schedule a meeting with you too.
If you were given another chance, what would you have said to this person?

Do
- Start off the task by providing a beginning sentence to get the story started, and then go around the classroom getting each one to add a new sentence to keep the story going.
- This task should be done spontaneously allowing only a little time to think (30 seconds).
- For example: There was once a student who was looking for a job after graduation.
Notes for Facilitation

- Tell the participants to follow these steps to create a great pitch, but bear in mind that you’ll need to vary your approach depending on what your pitch is about.

1. **Identify Your Goal**: Start by thinking about the objective of your pitch. For instance, do you want to tell the potential clients about your organization? Do you have a great new product idea that you want to pitch to an executive or do you want a simple and engaging speech to explain what you do for a living?

2. **Explain What You Do**: Start your pitch by describing what your organization does. Focus on the problems that you solve and how you help people. Ask yourself this question as you start writing: what do you want your audience to remember most about you? Keep in mind that your pitch should excite you first. After all, if you don’t get excited about what you’re saying neither will your audience. People may not remember everything that you say, but they will likely remember your enthusiasm.

3. **Communicate Your USP**: Your elevator pitch also needs to communicate your unique selling proposition or USP. Identify what makes you, your organization or your idea unique. You’ll want to communicate your USP after you’ve talked about what you do.

4. **Engage with a Question**: After you communicate your USP, you need to engage your audience. To do this, prepare open-ended questions (questions that can’t be answered with a “yes” or “no” answer) to involve them in the conversation. Make sure that you’re able to answer any questions that he or she may have.

5. **Put it all Together**: When you’ve completed each section of your pitch, put it all together. Then, read it aloud and use a stopwatch to time how long it takes. It should be no longer than 20-30 seconds. Remember, the shorter it is, the better!

**Example:**

Here’s how your pitch could come together:

“My company deals with cloth retail online business and we use various e-commerce platforms to sell our products. This means that you can do shopping with ease and spend time on other important tasks. Unlike other similar companies, we have a strong feedback mechanism to find out exactly what people need. This means that, on average, 95 percent of our clients are happy with our products. So, how can you help us in creating our own web portal?

6. **Practice**: Like anything else, practice makes perfect. Remember, how you say it is just as important as what you say. If you don’t practice, it’s likely that you’ll talk too fast, sound unnatural or forget important elements of your pitch. Set a goal to practice your pitch regularly. The more you practice, the more natural your pitch will become. Practice in front of a mirror or in front of colleagues until the pitch feels natural.

**Summarize**

- Close the discussion by summarizing how to speak effectively as discussed in the Participant Handbook.

At that time, the tech bubble popped and technology companies were running in losses. Finally, money ran out. So One97 took loans and then more loans at higher rates of interest, as high as 24 per cent, and became caught in a vicious cycle.

In 2014, Paytm was launched with online wallet services after which, the company enabled online payment transactions. The company got licenses from RBI in 2016 to launch India’s first ever payment bank. Moreover, the main motive of Paytm was to transform India into a cashless economy.

When he was young, he stood at Marine Drive and said, “I will rule this city one day”. Failure was not just his companion during or before his stardom, it is still a substantial part of his life.
