Unit 2.6 ‐ Knowledge and Understanding on Organizational Product and Process

Unit Objectives

At the end of this unit you will be able to:

1. Identify the additional packaging requirements
2. Explain various handling standards used in packaging
3. Describe the reporting procedures

Warehouse is a place where manufactured goods are stored in bulk and in large quantities and broken into smaller pieces as per the customer requirements. It is the responsibility of a Warehouse Packer to identify and choose the right packaging material to pack the product or item to the customer.

Packaging labels help logistics channel partners to identify how the packed product needs additional care related to handling and moving. A label provides complete information regarding the product. It mainly includes ingredients of the product, its usage, caution in use, cares to be taken while using it, date of manufacturing, batch number, etc.

The universal recycling symbol, which is three folded arrows that form a triangle, was created by Gary Anderson, a student at the University of Southern California in 1970. He created it as part of a contest associated to the very first Earth Day.

Elaborate

- All containers and packaging must be designed with consideration given to ergonomics and ease of part removal. Appropriate consideration must be given to unit load height restrictions, weight restrictions, carton disassembly and other requirements which may affect ergonomics and worker safety.
- The purpose of a packaging label is to facilitate the movement of goods and the exchange of data among all members within a channel of distribution (suppliers, carriers, customers and others). The amount of data (bar code as well as human readable text) needed on a label is a function of the needs of the trading partners involved.

Explain

- Explain the important features of packaging
- Explain the symbols used in package labeling
- Explain the meaning of different packaging symbols

Explain how consumers will identify the nature of the product or material with the help of a packaging label.

Why is packaging such an important aspect of marketing?

Activity

Ask the student to design and come up with a packaging label for the following:

Unit 3.1 - Receiving items for packaging

Unit Objectives

At the end of this unit you will be able to:
1. Explain how a packer will receive an item/product in the packing area
2. Recognize the importance of handling standards in packaging
3. Explain the required ergonomic standards to be followed in packing

Say

- Packing Stations are a crucial addition to any warehouse, distribution center or online retail for packing and dispatch.
- Ergonomics it’s about combining the science of the human body with design to create products that look great, perform flawlessly and fit perfectly.
- The most important function of ergonomics in packaging design is physical and psychological relationship between objects and the warehouse packer who use them. User has to interact with the equipment in healthy, comfortable, and efficient manner. Ergonomics is to make the usage of the given product easier, more comfortable and clearer to understand.
- The common packaging ergonomics in the case of a warehouse packer is the most important part of humans body is a hand. Our hands interact with every packaging, we touch, carry, hold, open, close and grab it by our hands.

![Fig 3.1 : Hand Ergonomics](image)

- Equal consideration is also required to give for other activity like bending, vertebral ergonomics, eye ergonomics, neck etc
Notes for Facilitation

- You could ask the students to volunteer himself/herself to demonstrate various ergonomics postures which one might come across during packaging
- Show some of the pictures of packaging station for better understanding
Unit 3.2 - Importance of Standard Operating Procedure - SOP

Unit 3.3 - Safety Protection in Packing

Unit Objectives

At the end of this unit you will be able to:
1. Explain the importance of safety in packing
2. Describe the parameters to be considered in packing
3. Identify different forms of packing materials used for cushioning

Explain

- The importance of additional internal packaging or cushioning materials considering product safety
- How to select the cushioning material with respect to the product nature
- The different classification of cushioning materials

Elaborate

- Internal packaging is the most vital part in the process of product protection. Whenever a package is dropped, a shockwave of energy is transmitted through the package. This shock wave can ultimately damage or fracture the product.
- A blocking and bracing material works by preventing an item from moving from the center of a box to the side or bottom. By isolating an item and keeping it away from the shock generating surfaces, most damage can be avoided.
- Using sheet material of various types, individual pieces are wrapped to protect small items. This method is not adequate for the protection of heavyweight products, but is used primarily as a surface protection.

- Packages and labels communicate how to use, transport, recycle, or dispose of the package or product.
- Labels serve to capture the attention of shoppers as well as provide useful information regarding the product.

• The Forklift Operator is responsible for operating a forklift to move, locate, relocate, stack, and count products.
• An inventory clerk works with stored goods in a warehouse environment, facilitating the movement of goods going out to customers and coming in for use. They also help track and keep accurate counts of items on hand and utilize these numbers. Say

- Standards are essential for understanding the current status of a process, for supporting continuous improvements and measuring improvements.
- It is not mandatory to standardize the work but the expected inputs, procedures and outputs must also be documented in detail.
- The documentation should be so clear that an outsider should be able to step into the process, understand the process and soon operate as a fully functioning team member, making appropriate contributions to the process.
- The most important processes in a warehouse operations are documented with the help of Standard Operating Procedure and it is reviewed continuously for further improvements.
Elaborate

- Take a walk through in any multi-national shop and observe the actions being taken to serve the customer. Rarely will you see someone with an open work instruction book reading about how his or her particular task is to be completed. The vast majority of shop employees know what it takes to ensure that a high-quality product arrives at the customer’s dock on time. They have been instructed in specific tasks, and they follow those instructions.

- So what is the purpose of documented work instructions? Besides having them available for audit review, why do such documents exist? Work instructions are developed to guide workers in four key quality areas: training, reference, problem solving and continuous improvement.

- Each of these areas can be directly related to the Deming Cycle, a cycle that identifies fundamental quality planning as “Plan-Do-Check-Act.” It is important to establish (plan) the instructions that your people must execute. The references must then be effectively implemented (do) so they are accessible to personnel. Documentation must be verified (check) so the instructions assist your problem-solving methodology. Finally, it is important to use (act) what has been defined in order to continuously improve.

- Planning and organization make efficient use of your time at the office by keeping you focused from beginning to completion of a project.
- An organizational plan also facilitates collaboration and information sharing with other team members who play a role in the completion of the activities.
- What is planning? Action planning is a process which helps you to focus your ideas and decide on the steps you need to take in order to achieve a particular goal. Planning is vital at all levels in the work place. You need to plan your own tasks and time.
- Warehouse Packer is an individual who would examine and inspect containers, materials, and products in order to ensure that packing specifications are met.
- The Warehouse Packer is also responsible for record product, packaging, and order information on specified forms and records, Remove completed or defective products or materials, placing them on moving equipment such as conveyors or in specified areas such as loading docks.

6. Brief about the importance of housekeeping in warehouse

Say

- The essential factors for the smooth operation of every warehouse are health and safety.
- There are several health and safety issues to be concerned with if you are working in a warehouse and each staff member should be provided with a health and safety training which covers all of the main topics one should be concerned with.
- The Warehouse Packer as a responsible individual needs to ensure that all the warehouse employees are using all the necessary PPE's- Personal Protective Equipment for safe working.
- Warehouse Packer needs to ensure that they familiarize themselves and warehouse operatives with the company's Health and Safety Policy and ensure the safety of themselves and that of other staff members, colleagues & visitors is paramount.
- Warehouse Packer needs to ensure and maintain a safe environment by adhering to compliance with standard safety and operating procedures, processing and follow up of all Hazard Reports, needs to instruct personnel in the use and care of PPE and ensure compliance with, compliance with WHMIS and other legislation as it pertains to areas of responsibility

Unit Objectives

At the end of this unit you will be able to:

1. Explain about firefighting standards and prerequisites
2. Recognize about assembly points and evacuation plan
3. Get awareness on various safety mock drills and how to react during emergency situations

Say

• An evacuation plan lays out how to exit a warehouse safely during an emergency time. Every member of the warehouse and visitors should be familiar with several ways to leave the warehouse and know a safe meeting place outside the building. In simple terms ‘Emergency evacuation plan is the immediate and urgent movement of people away from the threat or actual occurrence of a hazard’.

• Certain areas have been designated as ‘Safe assembly points’ in a warehouse. It is advisable that all the warehouse colleagues should assemble at the specified assembly points in case of an emergency. This is useful for the responsible personnel (departmental safety officers/fire wardens/supervisors etc.) to know the where-about of their colleagues in the event of any disaster or accidents. The specific assembly points should have been indicated in the fire escape routes maps posted at the area.

• First aid mock drills will test the efficiency of the emergency response procedures required in a non-emergency situation and to educate the warehouse employee to react quickly during the critical emergency times. This could be of any types like fatal injuries to a co-worker, snake bite mock drill, fire accidents etc.
**Activity**

- Try to organize a ‘Safety Mock drill’ by carrying out the following procedures
  1. Give a warning to the students by blowing a whistle or siren about the mock drill
  2. Mark a safe assembly point outside the class room and make the students to assemble in the specified area till the next clearance command is received
  3. Make a report of the late arrivals, any accident happened, any challenges in arriving at the safe assembly point
  4. Perform some sample fire put offs using a fire extinguisher or using a sand or water bucket to put off the fire
  5. Perform some sample ‘First aid’ mock drill for any hand or leg accident by using proper medical equipment

**Exercise**

1. List any 3 common type of workplace hazards
2. What is safe assembly point?

This Facilitator's guide includes various activities which will help you as a facilitator to make the sessions participative and interactive.

Ice Breaker

- You can begin the module with the following ice breaker:

Five of Anything Ice Breaker Steps:

- Divide the participants into groups of four or five by having them number off. (You do this because people generally begin a meeting by sitting with the people they already know best.)
- Tell the newly formed groups that their assignment is to share their five favourite movies of all time, their five favourite novels or their five least liked films. The topic can be five of anything - most liked or disliked.
- This ice breaker helps the group explore shared interests more broadly and sparks lots of discussion about why each person likes or dislikes their selected five.
- Tell the groups that one person must take notes and be ready to share the highlights of their group discussion with the class upon completion of the assignment.

Expectation Mapping

1. During the first session and after ice breaker session, ask the participants to answer the following question: “What do I expect to learn from this training?”
2. Have one of the participants write their contributions on a flip chart sheet.
3. Write down your own list of covered material in the training on another flip chart sheet.
4. Compare the two sheets, commenting on what will and what will not be covered during the training.
5. Set some ground rules for the training sessions. Ask the participants to put these rules on a flip chart and display it in the class.
6. You may get back to those sheets once again at the end of the last session of the training.
7. Benefits of doing this activity:
   - Participants feel better as their opinions are heard.
   - Participants get to know what they should expect from the training.
   - The facilitator gets to know which points to emphasize, which to leave out, and which to add during the training.
8. Expectations from the participants:
   - Must sign the attendance sheet when they arrive for class.
   - Conduct themselves in a positive manner
   - Be punctual, attentive, and participative
9. Explain the contents that are going to get covered one by one and connect it with the expectation mapping done earlier.
10. By the end of this exercise, the participants should have a clear understanding of what to expect from the session and what are the areas that will not get covered.

Defining Objectives

1. Defining the objectives in the beginning of the units sets the mood for the unit.
2. To begin with the end in mind sets the expectations of the participants as what could be the important takeaways from the session.
3. It is also a way of making participants take responsibility of their own learning process.
4. For the facilitator, the objectives decide a designed path to progress on so that the learning stays aligned and on track.
5. Read the objectives slowly, one by one, and ask the participants to explain what they think it means.
6. At the end of the session, you could again revisit the objectives to find out from the participants about how many objectives have been achieved.

**In order to effectively facilitate this workshop:**
1. You must have thorough knowledge of the material in the Participant Handbook, and be prepared to answer questions about it.
2. You may also wish to read other material to enhance your knowledge of the subject.
3. There may be issues raised with which you are not able to deal, either because of lack of time or knowledge. You can either state that you will obtain answers and get back to the participants with the information. Incase the query can be turned to an assignment to the class, do so. You can work with the the participants on the assignement.
4. You must have a very clear understanding of what the participants want to accomplish by the end of the workshop and the means to guide the participants.
5. As the facilitator, it is your responsibility to make sure that all logistical arrangements are made for the workshop. This may involve doing it yourself or confirming that someone else has made all necessary arrangements associated with the workshop. Assume nothing and check everything before the workshop begins.
6. To break the monotony and boredom during sessions, introduce mini breaks in the form of stretching exercises, jokes, some group songs or games.
7. Invite discussion from the participants.
8. Probe the participants further and lead them to come to affirmative conclusions.
9. Let the participants answer. No answer is incorrect.
10. Ask one participant to write all the points on the whiteboard.
11. Build the sessions from the answers provided by the class.
12. Prepare for the sessions in advance so that the resources like flipcharts, handouts, blank sheets of paper, marker pens, etc. can be kept ready.
13. Ensure that resources like board, markers, duster etc. is available before your session starts.

**General instructions for role playing:**
1. You are not being asked to be an actor or to entertain. The purpose of the role play is to provide a situation in which you can practice certain skills.
2. When you read the brief, try to imagine yourself in the situation described and behave in a way you feel to be natural – but be conscious of the fact that your role may require a different approach from that which you might normally use.
3. You (and others) may benefit from the change in approach and behaviour. Therefore, try to use the approach you feel to be most appropriate for the circumstances described in your brief.
4. The brief is just the starting point. It simply sets the scene and the tone of session or activity. Try not to keep referring to the brief as this will affect the spontaneity of the meeting. Allow the role play to develop as you think it might in real life and change your reactions in line with the behaviour and responses of others involved.
5. If you find that you have too little information to answer questions or to describe what has happened in the situation, do feel free to add your own thoughts and ideas. Try to keep these within the framework of the role you are taking and try to make your improvisations as realistic as possible.

The tide was fresh and the starfish were alive. The man took a few steps, picked one and threw it into the water. He did that repeatedly. Right behind him there was another person who couldn’t understand what this man was doing. He caught up with him and asked, “What are you doing? There are hundreds of starfish. How many can you help? What difference does it make?” This man did not reply, took two more steps, picked up another one, threw it into the water, and said, “It makes a difference to this one.” What difference are we making? UNIT 6.1.6: Time Management

Unit Objectives

At the end of this unit, participants will be able to:

- Discuss the benefits of time management
- List the traits of effective time managers
- Describe effective time management techniques

Resources to be Used

- Participant Handbook

Ask

Does this sound like you?

- I can never get enough time to finish what I am doing in a day.
- I have so many things to do that I get confused.
- I want to go for a walk and exercise, but I just do not have the time.
- I had so much to do, so I could not deliver that order on time.
- I would love to start my dream business; but, I just do not have the time.

Example

Let’s look at these two examples:

Example 1:
Ankita works from home as a freelance writer. She says she can easily put in 8 hours of dedicated work in a day. Because she works from home, she saves money on travel and has a comfortable work routine. But there is a challenge and it is distraction. As she works from home, she can easily just get up and sit down on the sofa to watch TV, wasting valuable time. She may have chores to do, errands to run and bills to pay. She ends up working only two to three hours a day and the result is, her work gets piled up. She is unable to take on more work due to this. Even though her quality of work is appreciated her clients are not very happy about the delay in submission.

Example 2:
Javed has started a successful online selling company from home and makes a good living from his sales. He has set up a small office space in his living room. As both his parents are working full-time, he also has the role of taking care of his two younger siblings. He almost spends half of his day with the younger kids. He does not mind it but it means taking time away from the work. He is still able to manage his online business with these commitments. He wants to spend some more dedicated hours so as to increase his profits. He also wants to look into new business avenues. What should he be doing.

Ask

- Does this happen with you too?
- Do you find it difficult to prioritize your work?
- Are you able to manage your time effectively?
Activity

- Conduct a group discussion based on the above examples.
- Direct the discussion on how to prioritize work and manage time effectively.

Say

- Time management is not only about how hard you work but also about how smart you work.
- Discuss “What is Time Management” with the participants as given in the Participant Handbook.

Ask

- Why is it important to manage time? How does it help?
- What happens when you don’t manage your time effectively?
- Do you find it difficult to prioritize your work?

Say

- Discuss the benefits of time management given in the Participant Handbook.
- Let’s learn effective time management with the help of an activity.

Activity

Effective Time Management

- This activity has two parts:

PART 1

TO-DO LIST

- You have to make a to-do list.
- List all of the activities/tasks that you have to do.
- Try to include everything that takes up your time, however unimportant it may be.
- If they are large tasks, break them into action steps, and write this down with the larger task.
- You can make one list for all your tasks or have separate to-do lists for personal and professional tasks.

PART 2

URGENT-IMPORTANT GRID

- You have to make a grid as shown on the board here.
- This grid has four boxes. As you can see, each box has a different heading.
- At the heart of the urgent-important grid, are these two questions:
  - Is this task important?
  - Is this task urgent?
- Now, you have to think about each activity that you have written in your to-do list and put it into one of the four categories.
- What do these categories depict?
- Category 1: Urgent/Important
  - This category is for the highest priority tasks. They need to get done now.
Conduct a group discussion based on the above examples.

Direct the discussion on how to prioritize work and manage time effectively.

Say:

Time management is not only about how hard you work but also about how smart you work.

Discuss "What is Time Management" with the participants as given in the Participant Handbook.

Do you find it difficult to prioritize your work?

**Category 2: Not Urgent/Important**
- This is where you want to spend most of your time.
- This category allows you to work on something important and have the time to do it properly.
- This will help you produce high quality work in an efficient manner.
- The tasks in this category are probably the most neglected ones, but also the most crucial ones for success.
- The tasks in this category can include strategic thinking, deciding on goals or general direction and planning – all vital parts of running a successful business.

**Category 3: Urgent/Not Important**
- This is where you are busy but not productive. These tasks are often mistaken to be important, when they’re most often busywork.
- Urgent but not important tasks are things that prevent you from achieving your goals.
- However, some may be activities that other people want you to do.

**Category 4: Not Important and Not Urgent**
- This category doesn't really include tasks, but rather habits that provide comfort, and a refuge from being disciplined and rigorous with your time management.
- Some may be activities that other people want you to do.
- These might include unplanned leisure activities as well.

Do Put down the formats for the to-do list and the urgent/important grid on the board.

Instruct the participants to prepare their to-do list first.

Give the participants 10 minutes to prepare the list.

Once done, instruct them to divide the tasks in to-do list into the four categories.

Explain the four categories to the participants giving examples specific to their context.

As you explain the categories fill the grid with the type of tasks.

Give the participants 40 minutes to fill the grid.

Then explain how to balance the tasks between the four categories.

Keep a check on time. Tell the group to wind up quickly if they go beyond the given time limit.

Activity Debrief:
How can we balance tasks between the four categories?
How to manage time through this grid?

Category 1: Urgent/Important
- Try to keep as few tasks as possible here, with the aim to eliminate.
- If you spend too much of your time in this category, you are working solely as a trouble shooter, and never finding time to work on longer-term plans.

Category 2: Not Urgent/Important
- Plan these tasks carefully and efficiently as they are most crucial ones for success.
- If necessary, also plan where you will do these tasks, so that you're free from interruptions.
- Include strategic thinking, deciding on goals or general direction and planning in your planning process.

Category 3: Urgent/Not Important
- Ask yourself whether you can reschedule or delegate them.
- A common source of such activities is other people. Sometimes it's appropriate to say "no" to people politely, or to encourage them to solve the problem themselves.

Category 4: Not Important and Not Urgent
- You also want to minimize the tasks that you have in this category.
- These activities are just a distraction – avoid them if possible.
- You can simply ignore or cancel many of them.
- Politely say "no" to work assigned by others, if you can, and explain why you cannot do it.
- Schedule your leisure activities carefully so that they don't have an impact on other important tasks.

Discuss the traits of effective time managers and effective time management techniques as given in the Participant Handbook.

Here is a short story. You can conclude the session narrating the story. To make it more interesting you can perform the demonstration described and discuss the short story.

One day an expert in time management was speaking to a group of students. As he stood in front of the group, he pulled out a large wide-mouthed glass jar and set it on the table in front of him. Then he took out a bag of about a dozen rocks and placed them, one at a time, into the jar. When the jar was filled to the top and no more rocks would fit inside, he asked, "Is this jar full?" Everyone in the class said, "Yes." Then he said, "Really?"

He reached under the table and pulled out a bucket of gravel (small stones). He dumped some gravel in and shook the jar causing pieces of gravel to work themselves down into the space between the rocks. Then he asked the group once more, "Is the jar full?" By this time, the class began to understand. "Probably not," one of them answered. "Good!" he replied.

He reached under the table and brought out a bucket of sand. He started dumping the sand in the jar and it went into all of the spaces left between the rocks and the gravel. Once more he asked the question, "Is this jar full?" No!" the class shouted. Once again he said, "Good." Then he grabbed a jug of water and began to pour it in until the jar was filled to the brim. Then he looked at the class and asked, "What is the point of this illustration? "One student raised his hand and said, "No matter how full your schedule is, if you try really hard you can always fit some more things in it!" "No," the speaker replied, "that's not the point. The truth this illustration teaches us is: If you don't put the big rocks in first, you'll never get them in at all." What are the 'big rocks' in your life? Your children; your loved ones; your education; your dreams; a worthy cause; teaching or mentoring others; doing things that you love; time for yourself; your health; your mate (or significant other). Remember to put these BIG ROCKS in first or you'll never get them in at all. If you sweat about the little stuff (the gravel, sand, and water) then you'll fill your life with little things you worry about that don't really matter, and you'll never have the time you need to spend on the big, important stuff (the big rocks).

End the story with these lines...

So, tonight, or in the morning tomorrow, when you are reflecting on this short story, ask yourself this question: What are the 'big rocks' in my life? Then, put those in your jar first

De-brief:

Scenario 1
The cause of stress was lack of time management and the habit of procrastinating. If Akash would have managed his time well, planned alternate ways to get up on time, finished prior tasks on time and planned for client meetings in advance then he wouldn’t have faced stress.
Do

- Ask one of the participant who can volunteer and read out this scenario to the class.

Scenario 5
Rakesh lives in Kathmandu with his wife and two beautiful daughters Sarah and Sanya. Nepal was hit by a massive earthquake and Rakesh’s building collapsed during the earthquake. During evacuation, Rakesh realised that though his wife and Sarah were fine and suffered only minor bruises, Sanya was nowhere in the scene. Panic stricken, he started calling her name and searching her frantically. A little later, he heard a meek voice from beneath the debris. He quickly removed the rubble to find a huge bed. Rakesh was pretty sure that Sanya was trapped underneath. Though he was badly bruised, he gathered all his courage and with all his might, he lifted the several-ton bed to save Sanya’s life. Everyone was relieved to see Sanya alive and also extremely surprised to see this father’s ability to access superhuman strength.

- Ask the audience to applaud for the participant after the scenario is read completely.
- Discuss the scenario, ask de-brief questions:
  - What kind of stress was Rakesh undergoing in this case?
  - Was the stress avoidable or manageable under the given circumstances?
  - What was the result of the stress?

Say

De-brief:
- Not all stress is harmful; good stress is actually energizing. This was a case of lifesaving stress, or hero stress, which is an important example of good stress. You may have heard stories in which a person performs an impossible feat of physical strength in order to save their life or the life of someone they love. This type of stress causing a surge of adrenaline is good for us.

- E-commerce emerged in the early 1990s, and its use has increased at a rapid rate. Today, many companies sell their products online. Everything from food, clothes, entertainment, furniture, and many other items can be purchased online.

- Discuss all types of E-commerce by giving examples and names of some popular websites which use them.

- Make the discussion interactive by asking the class to share some popular e-commerce sites of each type.

- Discuss benefits of E-commerce from the Participant Handbook.

- The majority of the population that uses E-commerce activities lives in tier-1 and tier-2 cities. To encourage the use of digital money in tier-3 and 4 areas, PM Mr. Modi launched the “Digital India Campaign”.

- By Digital India project the government will deliver services via mobile connectivity and in doing so, is expected to bring the internet and broadband to remote corners of the country. This connectivity will in turn enhance e-commerce activities also. Furthermore, the Indian Government is also modernizing India Post and aims to develop it as a distribution channel for e-commerce related services.

- Now let us discuss how to sell a product using E-commerce.

- Every product has to be sold on a platform on the internet. Think of it as a shop that you have to sell your product. Now this shop can be your own or shared or rented. If the shop is your own or rented there will be only your products in that shop. If the shop is shared, there will be products of multiple sellers in that shop. A common example is a departmental store which has products from multiple brands in the shop.

- Similarly, in E-commerce the shop is the website where your products are displayed. If it is your own website it will exclusively showcase your products. In this case the cost that you will incur will be:
  - Developing the website
  - Hosting the website
  - Maintenance of the website

- If you rent a website it will also showcase your own products but the development, hosting and maintenance parts go to the owner. This saves time and the cost to manage these activities.

- Smaller companies usually go for renting a website and the bigger ones develop their own website.

- The concept of shared platforms has become very popular in recent times. In this platform the sellers have to register and then they can sell their goods on a common platform. Among the most popular of these are Amazon, Myntra, Flipkart, etc.

**Role Play**

- Tell the participants to choose a product or service that they want to sell online.

- Tell them to write a brief note explaining how they will use existing e-commerce platforms, or create a new e-commerce platform to sell their product or service.
Demonetization has made carrying cash in the wallet very difficult. People either shop through cards or some other form of digital money.

So what do you think is digital money?

In this form the money is both paid and received digitally. There is no hard cash involved. It is an instant and convenient way to make payments.

There are various types of digital payments. Let us discuss some of them in brief here.

The first one is the most commonly used system i.e. the cards. Debit card, credit card, prepaid card, all fall under this category.

Then is the e-wallet or the mobile wallet. This has become the most used form of digital money after demonetization. Examples are Paytm, state bank buddy, Freecharge, etc.

Many other forms of digital money are also coming up in market like mobile apps, Aadhar card based payment, etc.

Digital money gives a lot of advantages over the conventional hard cash. Some of them are:

- Digital payments are easy and convenient. You do not need to take loads of cash with you, a mobile phone or a card will suffice.
- With digital payment modes, you can pay from anywhere anytime.
- Digital payments have less risk.

Ask

- How much money are you carrying in your wallet?
- Do you have a credit/debit card?
- How do you make payments while doing online shopping?

Ask

- Why do you think people have started using digital money instead of hard cash? Is demonetization the only reason?

Summarize

- Ask the participants what they have learnt from this exercise/ activity.
- Ask if they have any questions related to what they have talked about so far.
- Close the discussion by summarizing the importance of e-commerce and digital money.

- Then, the interviewer will bluntly ask the following questions:

- The interviewer will start by asking the interviewee a few generic questions such as:

  - There are over 200 people who have applied for this job, some with excellent work experience. Why should I hire you?

### De-brief:

- There is nothing wrong with stating your strengths and achievements. However, do not come across as arrogant or too boastful.

  - Did you ever experience any neglect or disregard from your previous office? In other words, did you ever suffer because your office or team displayed favouritism?

### De-brief:

- Keep this in mind: Do not criticize anyone during an interview.
- You are free to express your opinion, however, your language, answers, body language, and the tone of your voice should remain constructive and neutral.
- Since criticism will show you in negative light, you should keep your answers honest yet diplomatic.
- You can tackle such questions by saying, “I got along well with most of my faculty and peers.”

- After the candidate responds, ask sarcastically:
  - Do you seriously mean that?

**Say**

De-brief:
- Don’t provide unreal and idealistic answers.
- Your answers should be honest yet diplomatic. In a situation like this, the interviewer does not expect you to provide a specific timeline.

  - What is your name?
  - Tell me something about yourself?
  - Can you tell me something about your family?
- Then, bringing the interview to a close, ask the interviewee:
  - Do you have any questions for me?

**Say**

De-brief:
- Ask relevant questions.
- Don’t bombard the interviewer with questions.
- If you have questions about the result of the interview, you can limit your questions to 1 or 2. Keep them short and relevant like:
  - When will I be informed about the results of the interview?
  - What are the working hours?
  - Will the job require me to travel?

Tell the participants to be prepared for answering different types of questions in an interview. Stay calm and focused, and take a moment to think about how you should respond. ## UNIT 6.5.3: Communication Skills: Listening & Speaking

### The Importance of Listening Effectively

#### Unit Objectives

- Participant Handbook
- Resources to be Used

#### Activity – Chinese Whisper

**Activity 1**

- **Step 1:** Form a circle.
- **Step 2:** Start a whisper chain. Any one participant will whisper a message into his/her neighbour’s ear. No one else must hear the message. The message can be serious or downright silly.
- **Step 3:** The next person who first heard the message should whisper the message very quickly to the person sitting next to them.

#### Debrief questions:

- **1.** Was the original message the same as the message that is communicated at the end of the game?
- **2.** Why do you think there was a difference in the messages?

### Communication

- Communication is a two-way process where people exchange information or express their thoughts and feelings.
- It involves effective speaking and effective listening.
- If I go to the store to get bread, I exchange money for the bread. I give something and get something in return. Communication takes place in the same manner. You have to provide and receive information for communication to take place.

### Ask Questions

- **1.** How often do you hear these statements?
  - “You’re not listening to me!”
  - “Why don’t you let me finish what I’m saying?”
  - “You just don’t understand!”

- **2.** What do you think the other person is trying to convey to you through these sentences?
- **3.** We will not talk about the importance of listening effectively as discussed in the Participant Handbook.

### Do the Activity

- **This is a class activity.**
- **The participants need to answer the questions they hear.**
- **Instruct them to listen carefully.**
- **You will read it at a stretch and if need be repeat it once more.**
- **Tell the participants to raise their hand if they know the answer to the question asked.**
- **Keep a check on time.**

</tr>
<tr>
<td>A man builds an ordinary house with four sides except that each side has a southern exposure. A bear comes to the door and rings the doorbell. What is the colour of the bear?</td>
<td></td>
</tr>
</tbody>
</table>
Answers:
- There's no law against a man marrying his widow's sister, but it would be the neatest trick in the book since to have a widow, the man would have to be dead.
- You'd get one hour's sleep since alarm clocks do not know the difference between morning and night.
- Oh, yes. They have a 26th of January in England. They also have a 27th, a 28th, and so on.
- First of all, you would light the match.
- Who said the Delhi Daredevils and the Chennai Super Kings were playing against each other in those games?
- Every SINGLE person died, but those two were married.
- You can't bury survivors under any law especially if they still have enough strength to object.
- The bear that rang the doorbell would have to be a white bear. The only place you could build a house with four southern exposures is at the North Pole where every direction is in South.

Ask
De-brief question:
- What were the barriers that came into your way of listening?
- How can you overcome barriers to listening?

Say
- There is a difference between hearing and listening.
- If you don't listen properly, the message may be misunderstood.
- Be open-minded while listening to someone.
- It is important to listen effectively and carefully without making assumptions.

Activity 3
Elevator Pitch:
You are in the lift of a hotel and you bumped into your former client who is a famous businessman. He has financed a lot of small business ventures and can finance your new start-up too. After exchanging pleasantries, he asks you what your organization does. You open your mouth, and then pause. Where do you even begin? Then, as you try to organize your thoughts, his meeting is called, and he is on his way. If you would have been better prepared, you're sure that he would have stayed long enough to schedule a meeting with you too.
If you were given another chance, what would you have said to this person?

Do
- Start off the task by providing a beginning sentence to get the story started, and then go around the classroom getting each one to add a new sentence to keep the story going.
- This task should be done spontaneously allowing only a little time to think (30 seconds).
- For example: There was once a student who was looking for a job after graduation.
• Tell the participants to follow these steps to create a great pitch, but bear in mind that you'll need to vary your approach depending on what your pitch is about.

1. **Identify Your Goal**: Start by thinking about the objective of your pitch. For instance, do you want to tell the potential clients about your organization? Do you have a great new product idea that you want to pitch to an executive or do you want a simple and engaging speech to explain what you do for a living?

2. **Explain What You Do**: Start your pitch by describing what your organization does. Focus on the problems that you solve and how you help people. Ask yourself this question as you start writing: what do you want your audience to remember most about you? Keep in mind that your pitch should excite you first. After all, if you don't get excited about what you're saying neither will your audience. People may not remember everything that you say, but they will likely remember your enthusiasm.

3. **Communicate Your USP**: Your elevator pitch also needs to communicate your unique selling proposition or USP. Identify what makes you, your organization or your idea unique. You'll want to communicate your USP after you've talked about what you do.

4. **Engage with a Question**: After you communicate your USP, you need to engage your audience. To do this, prepare open-ended questions (questions that can't be answered with a "yes" or "no" answer) to involve them in the conversation. Make sure that you're able to answer any questions that he or she may have.

5. **Put it all Together**: When you've completed each section of your pitch, put it all together. Then, read it aloud and use a stopwatch to time how long it takes. It should be no longer than 20-30 seconds. Remember, the shorter it is, the better!

**Example:**

Here's how your pitch could come together:

"My company deals with cloth retail online business and we use various e-commerce platforms to sell our products. This means that you can do shopping with ease and spend time on other important tasks. Unlike other similar companies, we have a strong feedback mechanism to find out exactly what people need. This means that, on average, 95 percent of our clients are happy with our products. So, how can you help us in creating our own web portal?"

6. **Practice**: Like anything else, practice makes perfect. Remember, how you say it is just as important as what you say. If you don't practice, it's likely that you'll talk too fast, sound unnatural or forget important elements of your pitch. Set a goal to practice your pitch regularly. The more you practice, the more natural your pitch will become. Practice in front of a mirror or in front of colleagues until the pitch feels natural.

**Summarize**

• Close the discussion by summarizing how to speak effectively as discussed in the Participant Handbook.

Vijay Shekhar Sharma is the founder of Paytm, which is a giant Indian e-commerce. He was born in a middle-class family in Uttar Pradesh. He started his first job at an MNC. He quit after six months and built a company One97 with his friends. As One97 grew bigger, it needed more money because it was running more servers, bigger teams, and had to pay royalty. At that time, the tech bubble popped and technology companies were running in losses. Finally, money ran out. So One97 took loans and then more loans at higher rates of interest, as high as 24 per cent, and became caught in a vicious cycle.

In 2014, Paytm was launched with online wallet services after which, the company enabled online payment transactions. The company got licenses from RBI in 2016 to launch India’s first ever payment bank. Moreover, the main motive of Paytm was to transform India into a cashless economy.

After demonetization came into effect, Vijay Shekhar Sharma started promoting online and digital transactions to deal with the cash crunch. Amidst all the chaos and challenges, he kept pushing himself, and today he stands tall as the ‘Badshah of Bollywood’. Certainly those years were not easy for him.

When he was young, he stood at Marine Drive and said, “I will rule this city one day”. Failure was not just his companion during or before his stardom, it is still a substantial part of his life. Success does not come easy. What made him a star was his acceptance of failure and the urge to improve.

She placed an order for a new chester and TV cabinet via WhatsApp and requested Raju to send them as soon as possible. When the parcel reached Ankita through courier she found that chester was broken and the TV unit was chipped from the bottom. Ankita was heartbroken. It was a complete waste of money.
